- Tracks income and expenses

Matching Principle

Expenses are matched to the revenue they help generate within the same period.

Conservatism

Accountants should choose methods that avoid overstating income or assets.

Key Components of Financial Statements

Financial statements are the main reports produced by accounting systems. They offer insights into the financial position and performance of a business.

Balance Sheet

Shows a snapshot of a company's assets, liabilities, and equity at a specific point in time.

- **Assets:** What the business owns (cash, inventory, property)

Common Accounting Tools and Software

Modern accounting relies heavily on technology. Some popular tools include:

- QuickBooks
